

## Astrophotography: Inventory list

### Small Takahashi Telescope

Here is the complete list for the small Takahashi telescope. The different pieces are stored in cases (which are labeled in green) and bags, as shown on the picture of the cabinet interior (right panel). The whole set weights about 30 kilos.

Please check that the equipment is complete before taking it outside the institute. If not, please advise us immediately and do not take anything away. The telescope is considered under your responsibility once you borrow it.
